

Rockwool Blanket Insulation

Product Description

Einsulation Rockwool Wire mesh Blankets are lightly bonded mats stitched to a 1" galvanized hexagonal wire mesh. These blankets are recommended for thermal insulation of large pipes, flanges, valves, vessels and boilers and are ideal for insulating large curved surfaces.

Benefits

- Excellent thermal performance
- Easy to handle
- Low Chloride content
- Non combustible
- Chemically inert
- Low water vapor absorption
- Cost Effective
- CFC and HCFC free
- Resistance to high temperatures

Technical Characteristics

- 36" wide rolls
- Standard Thickness from 1" through 4"
- 1/2" thickness increments
- No asbestos content
- Highly Water repellent
- Resistant to fungi
- Non combustible

Relevant Specifications

- ASTM C592 Class II
- ASTM C 411
- ASTM C 795
- ASTM C 692
- ASTM C 871
